

POLICY DECISION – CAN 126

FINAL

OPEN POLICY: This policy is intended to be shared with stakeholders and may be freely distributed.

Interchange of Licence

The changing of a licence type part way through a 12 month licence period (interchange from R&D to High TCH Cultivation)

Date established: 09 March 2023

Date reviewed: 16 August 2023

Overview

This policy documents the GSC's decision to permit the interchange of a Medicinal Cannabis Licence from a Research and Development Licence (R&D) to a High THC Cultivation (HC) Licence, part way through a 12 month licence period.

It is recognised by the GSC that a company operating under a R&D licence may make a request to interchange to HC part way through a 12 month licence period for business reasons.

Detail

To consider the interchange of licenses, the GSC has the same requirements as a new application, including the approval of the Commission.

The company is required to provide a full business plan for the HC licence, which will go through the usual application and approval process – details of which are documented separately in the application guidance.
